## EDUCATION

---

### Bachelor of Technology in Information Technology

Graphic Era Deemed To Be University , Dehradun , Uttarakhand , India·2023 · **8.85 CGPA**

### Senior Secondary (CBSE)

Rainbow Public School·Chauras , Tehri Garhwal , Uttarakhand , India·2019 · **72.6%**

### Higher Secondary (ICSE)

St Theresa's Convent ·Srinagar Garhwal , Pauri Garhwal , Uttarakhand , India·2017· **82.66%**

## EXPERIENCE

---

### SDE-1 Android

### Sunfox Technologies Private Limited

April 2025 - Present , Dehradun , India

- Building and scaling the **Spandan-One medical ecosystem** for real-time ECG monitoring, leveraging **BLoC state management** and **Android Foreground Services** to ensure reliable real-time data syncing.
- Designed a **high-performance offline data layer** using **Floor (SQLite) and Hive (NoSQL)**, implementing **robust data migration strategies** to guarantee zero data loss across major app upgrades.
- Integrated **Government of India's ABHA (Ayushman Bharat) SDK and APIs**, enabling centralized patient health records and seamless data exchange within the **National Digital Health Mission (NDHM)** ecosystem.
- Architected specialized **Guest and Clinic operational modes**, optimizing workflows and enforcing **strict data privacy controls** based on user personas and environments.
- Developed a **secure medical document module** for encrypted PDF generation and sharing, handling **Android scoped storage, runtime permissions, Path Provider, and Permission Handler**.
- Led a **complete UI/UX modernization** by creating the **Spandan Design System**, delivering a consistent, scalable, and premium user experience through reusable themes and custom UI components.
- Implemented **Flutter-Native Android bridging** to interface directly with medical hardware, managing **Gradle Build Flavors, Manifest configurations** .
- Boosted app retention and usability by developing **custom navigation guards (PopScope)** and **async feedback mechanisms**, preventing accidental exits during critical monitoring sessions.
- Ensured **reliability for life-critical software**, achieving a **99.9% crash-free rate** through debugging in **Kotlin & Java**, performance optimization, and continuous refactoring.

### Software Engineer - Flutter App

### SmartConnect Technologies Private Limited

November 2023 - March 2025 , Mumbai , India

- Developed an efficient Multi-Application Configurable Dashboard for viewing the metrics of multiple application at once ; **BLoC , Streams, Data Encryption , Dynamic Charts , In App Updates(Google PlayStore and Custom Updates) , SharedPreferences**,
- Engineered multiple high-performance Android SDKs for CRM , Attendance , Doc-Scanner ; **Kotlin , CameraX , Google/Azure Maps , Gitlab Package Registry , Retrofit / okHTTP .**
- Architected and delivered 2 robust applications for CRM and Support Ticket Management using Flutter, enabling cross-platform compatibility ; **BLoC , SQLite HTTP , MusicPlayers , Camera(Flutter) , Deep Links , Push Notifications , Isolates**
- Migrated legacy Xamarin app to Flutter, improving maintainability, support, and reliability by 90% ; **Providers , Services(Foreground) , Push Notifications , Google Maps , Camera(Flutter)**
- Implemented Firebase SDK, Push Notifications, and In-App updates for enhanced user engagement.
- Developed scalable Cobrowse Android(SDK) / iOS(Framework) in Java/Swift for real-time collaborative browsing ; **Java , Swift , Socket.io , MediaProjection , Service(Foreground) , UI Overlay**
- Collectively designed over 120 plus **pixel perfect adaptive screens** with backend integration for various applications .
- Integrated Socket.io, RESTful APIs, Firebase, and Google SDKs for efficient data exchange.
- Identified and resolved **VAPT** issues, enhancing **application security** and demonstrating good cybersecurity best practices .
- Wrote **Unit** and **Integration test** for **code coverage**; **Flutter Test**
- Conducted code review and QnA sessions on each Friday to refactor code and apply effective and smart solutions to team's problems ; **SonarQube , Sonarlint**
- Provided support and solutions to clients like **Aditya Birla Capital Group** and **TVS , Motilal Oswal .**

## SDE - I

Lifespark Technologies Private Limited

July 2023 - October 2023 , Mumbai , India

- **Product Engineering:** Led the development and deployment of the "**Walk**" **application** (Playstore/Appstore), a Parkinson's patient aid that interfaces with wearable hardware via **BLE**.
- **Hardware & Real-time Data:** Implemented **bidirectional BLE communication** for remote configuration and processed real-time data from device sensors to provide immediate therapy feedback.
- **Infrastructure & DevOps:** Architected **CI/CD pipelines** using GitLab and Fastlane; established an **ML pipeline** utilizing Docker, AWS S3, and AWS Lambda for processing user mobility metrics.
- **Game Development:** Engineered a specialized **Football Therapy game** using Rive to meet custom patient therapy requirements.

## EXTRA PROJECTS

---

### Sipnudge (Part-time)

August 2025 – March 2026

- Built a **Flutter-based IoT hydration tracking app** integrated with a **Bluetooth-enabled smart bottle** for **real-time water intake monitoring and syncing**.
- Implemented **intelligent notification & alarm workflows**, including **Google Calendar integration** to **avoid alerts during meetings and overlapping events**.

- Designed **robust background syncing and offline-safe data pipelines**, ensuring **reliable tracking across network and device state changes**.
- 

## SKILLS

### Flutter & Cross-Platform

- Flutter, Dart, BLoC / Provider MVVM Architecture
- REST APIs, WebSockets, Real-time Data Sync
- Bluetooth & IoT Integration
- Background & Foreground Services
- Offline-first Architecture (SQLite / Floor, Hive)
- Firebase (Crashlytics, Analytics and more)
- Google APIs, Scoped Storage, Encrypted File Handling
- Code Optimization

### Android & Native

- Kotlin, Java, Native Android APIs
- Medical & IoT Hardware Integration
- Platform Channels (Flutter ↔ Android)
- Foreground Services, Bluetooth & Sensor APIs
- Retrofit, OkHttp
- Gradle Build Flavors, Manifest Configurations
- File Systems, Runtime Permissions
- Debugging & System-level Optimization

### Architecture & Engineering Practices

- MVVM, Clean Architecture, Modular Design
- Offline-first Systems, Secure Data Handling
- Performance Profiling, Crash Analysis, Production Debugging

### Soft Skills

- Clear Communication, Ownership Mindset, Product Thinking
- Deep Troubleshooting, Collaboration, Mentorship
- Rapid Experimentation, Continuous Improvement

## Patents & Publications

---

584714

24/03/2026

**A SYSTEM AND METHOD OF RELIABLE AND SECURE WARRANTY SYSTEM USING BLoCKCHAIN**

## ACHIEVEMENTS

---

**Silver Medallist - Btech IT 2019 - 2023**

**Gold Medallist - Robowars (IIT - Kharagpur January 2023)**

**Silver Medallist - Automate (IIT - Roorkee March 2023)**
